

CLAIMS

What is claimed is:

- 1 1. A method for multilingual global editing utilizing a network, comprising the
2 steps of:
 - 3 (a) receiving text in a first language from a first user utilizing a network;
 - 4 (b) translating the text from the first language to a second language;
 - 5 (c) transmitting the translated text to the first user utilizing the network;
 - 6 (d) allowing the first user to edit the translated text; and
 - 7 (e) sending the edited, translated text to a second user utilizing the network.
- 1 2. The method as recited in claim 1, wherein the translated text is displayed to
2 the first user on a display device for the allowing the first user to edit the
3 translated text.
- 1 3. The method as recited in claim 2, wherein a virtual keyboard is displayed to
2 the first user on a display device for the allowing the first user to edit the
3 translated text.
- 1 4. The method as recited in claim 3, wherein the virtual keyboard includes
2 alphanumeric characters in the second language.
- 1 5. The method as recited in claim 1, wherein the edited, translated text is saved.
- 1 6. The method as recited in claim 1, wherein the text relates to an apparel
2 industry.

1 7. A computer program product for multilingual global editing utilizing a
2 network, comprising:
3 (a) computer code for receiving text in a first language from a first user utilizing
4 a network;
5 (b) computer code for translating the text from the first language to a second
6 language;
7 (c) computer code for transmitting the translated text to the first user utilizing
8 the network;
9 (d) computer code for allowing the first user to edit the translated text; and
10 (e) computer code for sending the edited, translated text to a second user
11 utilizing the network.

1 8. The computer program product as recited in claim 7, wherein the translated
2 text is displayed to the first user on a display device for the allowing the first
3 user to edit the translated text.

1 9. The computer program product as recited in claim 8, wherein a virtual
2 keyboard is displayed to the first user on a display device for the allowing
3 the first user to edit the translated text.

1 10. The computer program product as recited in claim 9, wherein the virtual
2 keyboard includes alphanumeric characters in the second language.

1 11. The computer program product as recited in claim 7, wherein the edited,
2 translated text is saved.

1 12. The computer program product as recited in claim 7, wherein the text relates
2 to an apparel industry.

- 1 13. A system for multilingual global editing utilizing a network, comprising:
2 (a) logic for receiving text in a first language from a first user utilizing a
3 network;
4 (b) logic for translating the text from the first language to a second language;
5 (c) logic for transmitting the translated text to the first user utilizing the network;
6 (d) logic for allowing the first user to edit the translated text; and
7 (e) logic for sending the edited, translated text to a second user utilizing the
8 network.
- 1 14. The system as recited in claim 13, wherein the translated text is displayed to
2 the first user on a display device for the allowing the first user to edit the
3 translated text.
- 1 15. The system as recited in claim 14, wherein a virtual keyboard is displayed to
2 the first user on a display device for the allowing the first user to edit the
3 translated text.
- 1 16. The system as recited in claim 15, wherein the virtual keyboard includes
2 alphanumeric characters in the second language.
- 1 17. The system as recited in claim 13, wherein the edited, translated text is
2 saved.
- 1 18. The system as recited in claim 13, wherein the text relates to an apparel
2 industry.
